

# Bishnu Poudel

Data/ML/ AI Engineer, DevOps/Software Engineer

## Profile

For finance, retail, pharma and social-media clients, I have provided optimal solutions to data quality issues, machine learning applications, and data operations automation. Accurate communication, consuming optimal time and resources for delivery of solutions are my priorities.

- Strong Background in SQL, ML/ AI, Python-Dev, Cloud Infra

## Work experience

Present

↑  
Mar 2023

### Senior Data Engineer

*IBM India Pvt. Ltd.*

- For a database migration project in GCP-Big Query: improved code quality, recommended better quality-check and architecture strategies.
- Worked on API development and deployment project in GCP server-less. Delivered enhancements accurately and quickly while helping inexperienced folks ramp up.
- Tools: Python, Flask, SQL, GCP server-less infra, Git

Sep 2022

↑  
Mar 2022

### Lead Analyst, DevOps Engineer

*Ugam Solutions (aka Merkle), Bangalore*

- Technical support to run data pipelines, Spark Jobs, analytical queries on Hadoop for a social-network client.
- Decreased daily manual efforts by 75 % by automating routine tasks like file pickup, using GUI instead of CLI in remote VMs.
- Managed requests quicker, made communication transparent among 15+ requestors per day.
- Tools: Git, Hadoop, Python, Shell, REST API, Spark.

Feb 2019

↑  
May 2015

### Software Engineer, Data Operations Engineer

*Verisk (aka Cotiviti, fka Verscend), Kathmandu*

Automated data back-end and ETL operations in MS-SQL Server and .NET stack. In addition to daily operational duties, and resolving data-quality tickets, some notable projects were:

- Extracted key metrics from several unstructured text files. Daily data entry efforts for 50 files (1 million lines of text) per day was avoided
- Automated daily generation of critical XML files, several Excel Dashboards.
- Documented common troubleshooting techniques. Shared common solutions to adjacent teams working on similar projects.
- Tools used: TSQL, COBOL, SSIS, Excel, Python, Shell, .NET.

Mar 2015

↑  
Jun 2013

### Decision Scientist, Data QC Engineer

*Mu Sigma Inc., Bangalore*

- ETL migration, Data Quality assurance, Business-rules validation.
- Thorough quantitative checks and data validation on several roll-ups done by me provided a roadmap for the rest of the team to follow.
- Tools used: SQL, Informatica, Excel, SAS, R, QlikView.

## Education

### B.Tech. ECE, 2009-2013

- *NIT Durgapur, India*

- Data structures and Algorithms
- C, C++, OOP
- Operating Systems, Networks

### MS Data Science, 2019-20

- *NMBU University, Norway*

- Data structures and Algorithms
- Advanced Python, Data Science
- Computer vision, AI

## Skills

- Python (Flask, OOP, AI)
- SQL, T-SQL
- Google Cloud Dev, Architect, Security
- MongoDB, NoSQL
- Problem Solving
- Shell script, Batch Script
- Docker, Kubernetes
- DevOps, Automation
- ML, AI, NLP
- Git, Coding standards
- Distributed Computing
